

API Proxy Revisions

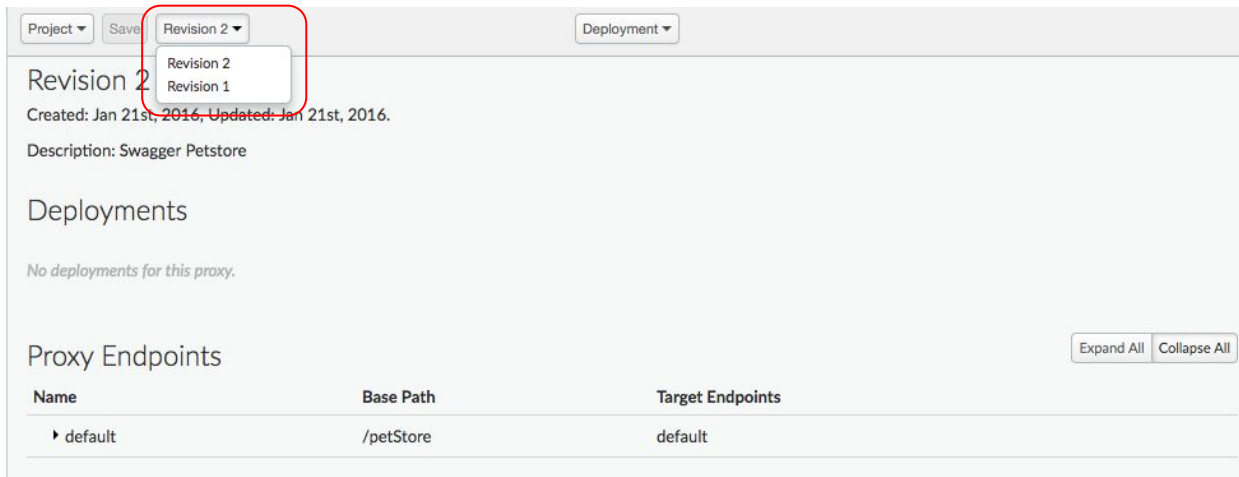

Revision or Version?

Revisions

- Unlimited number of revisions
- May be invisible to App Developers
- Managed within Edge platform

Within Edge

- Accessible via:
 - Edge UI Overview and Develop tabs
 - Management APIs
- Specific to an Organization

The screenshot shows the Apigee Edge UI interface. At the top, there is a navigation bar with a 'Project' dropdown, a 'Save' button, a 'Revision 2' dropdown (highlighted with a red box), and a 'Deployment' dropdown. Below the navigation bar, the main content area displays 'Revision 2' with a dropdown menu showing 'Revision 2' and 'Revision 1'. The text 'Created: Jan 21st, 2016. Updated: Jan 21st, 2016.' and 'Description: Swagger Petstore' are visible. Below this, the 'Deployments' section shows 'No deployments for this proxy.' The 'Proxy Endpoints' section has 'Expand All' and 'Collapse All' buttons. A table with three columns: 'Name', 'Base Path', and 'Target Endpoints' is shown. The table contains one row with the value 'default' in the 'Name' column, '/petStore' in the 'Base Path' column, and 'default' in the 'Target Endpoints' column.

Name	Base Path	Target Endpoints
▶ default	/petStore	default

Thank You
